## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Art Unit: 1745

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-8, 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Edwards et al. (Edwards) (New Rejection with regard to claims 12-14)

Reference is made to the Abstract of Edwards along with Figures 6-8 and 11-12. Also see column 6, lines 4-52 for the disclosure of the claimed subject matter. It is noted that when the battery case 100 as seen in Figure 6 of Edwards is turned on its side, then the plurality of positive and negative electrode plates are arranged in parallel to the long lateral walls of the case.

Applicant's arguments have all been considered but are not deemed persuasive.

Applicant argues that the electrode plates in Edwards are not parallel to the long lateral walls of the battery case. As set forth in the previous paragraph, when the battery case in Edwards is turned on one of its sides, then the plates located therein are parallel to the longest lateral wall of the case. It is well known in the battery art to utilize batteries with their terminals on the side walls thereof.

Applicant further argues that Edwards teaches battery plates that run horizontally so that electrolyte would not allow uniform distribution of electrolyte. As stated previously, with the cell of Edwards placed on one of its sides, the same would result in the battery plates not being horizontal and thus not impeding electrolyte flow.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1745

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards in view of Dougherty et al. (Dougherty)

The only claimed feature not taught by the lead acid battery in Edwards is the serpentine separator. The patent to Dougherty discloses in Figure 3 and in column 3, lines 3-61, a serpentine separator used in a lead acid battery. To utilize in the battery of Edwards the separator of Dougherty would have been obvious to one of ordinary skill in this art at the time the invention was made so that manufacturing costs would be reduced by making the lead acid battery in not requiring a cutting step for the separator.

Applicant did not argue the above rejection so that no rebuttal is necessary.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on Monday-Thursday and on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 703-308-2383.
